

# Vape→Jet

for dablicator.

## A Smarter Way to Fill with Dablicator™

Introducing the new Vape-Jet filling jig designed for Dablicator™ products that allows machine operators to fill 25 oil applicators each run. Precision machined out of Delrin with a non-slip neoprene layer on the under side for maximum strength and stability.

Automate your entire Dablicator™ filling workflow with the **Vape-Jet** fully-automatic cartridge filling machine or the **Jet Fueler** semi-automatic cartridge filling machine paired with the **Squish-o-Matic 1000** capping machine.
